# ***WE STAND BY OUR CRAFTSMANSHIP***

*Single Source. Trusted. Since 1972*

Since 1972 my family has been providing unparalleled construction services to customers throughout the Northeast. It has been through true grit, work ethic, and good old yankee values that have allowed Jewett to evolve over the past 51 years from a small home building company to New England's most trusted design build firm. We wanted to offer customers a solution that was single source responsibility, which allows customers to let us take their project from design to completion without any hassle, it's our commitment to our clients and their projects that ultimately makes us different and it's what make us better.

You have my commitment to honor our workmanship. For those of you who have not worked with our team, our Single Source, Trusted, Design Build delivery method works. Let us show you how!

I always say, the true meaning of success is making others successful. How can Jewett make you successful?

**CRAIG JEWETT**

Owner

A stylized, handwritten signature in black ink, consisting of a large, looping 'C' followed by a series of fluid, connected strokes that end in a small, sharp hook.

# ***OUR PHILOSOPHY***

*Life is All About Partnerships*

Jewett Construction's successful business operations and reputation are built on the principles of fair dealings and ethical conduct between our employees, clients, subcontractors and suppliers. Our reputation for excellence and integrity require constant observance of the latest construction techniques and the highest standards of conduct from our employees.

We feel strongly that there are great benefits to including Jewett Construction early in the design process. Our experience indicates the most successful projects involve collaboration, where trust and mutual respect are coupled with hard work and adherence to schedule and commitments.

We consistently seek out challenging projects where our management efforts of working closely with owners and architects result in successful and satisfying projects. We are extremely adept at managing complex projects with schedule and budget constraints. We take pride in our ability to analyze project requirements and anticipate potential problem areas. We find clear, open communication, including sharing information with the team members, ensures good results.

# LET'S TALK ABOUT ***YOUR PROJECT***

Our goal is to create a space that helps make your business become more successful. With more than four decades of experience, we have learned to assume nothing, and to collaborate closely with customers in a fair and ethical manner to find unique solutions for each project.

Our collaborative design-build delivery method combines architectural and engineering design services with construction performance, as a single team, under one contract. This integrated approach provides the most expedited project timeline and ensures coordination of all aspects of the project. We act as an extension of your team.
